Recommendation Report

DATE: June 23, 2020

TO: Board of Trustees

FROM: Darrel Robertson, Superintendent of Schools

SUBJECT: Setting of Ward Boundaries for the 2021 Municipal Election

ORIGINATOR: Dr. Lorne Parker, Assistant Superintendent

RESOURCE

STAFF: Josephine Duquette, Kim Holowatuk, Hodan Jama, Roshan Kastrinos, Roland Labbe,

Cathy MacDonald, Karen Mills, Carrie Rosa, Jennifer Thompson, Katie Woodfine,

Christopher Wright

REFERENCE: <u>Election Act</u>; <u>Education Act</u>, Sections 76 and 260 (4) (5)

ISSUE

The existing Trustee electoral ward boundaries (Attachment II) no longer meet the Trustee Electoral Ward Design Criteria, as amended on January 22, 2013. The *Education Act* requires school divisions to review ward boundaries, prior to December 31, 2020, to be enacted for the 2021 municipal and school board election.

BACKGROUND

Prior to 1989, all Public and Separate school board Trustees were elected city-wide. In 1989, the Minister of Education required Trustees to be elected by wards. Nine public and seven separate school Trustees were elected from within the existing City of Edmonton six-ward system. For the Edmonton Public School Division (EPSB), the recipient with the highest number of votes from each of the six wards was elected, along with the recipient of the second-highest number of votes in three of the six wards.

In 1995, nine public school Trustee electoral wards were implemented, which were distinct from municipal wards. Boundary alignments were chosen in order to distribute future urban growth and to ensure that ward populations remain within plus or minus 10 per cent of the average public school board supporting population for at least three elections. Wards were designed based on prioritizing a balance of the total public school supporting population among wards, rather than seeking to achieve a balance in the number of schools or students within a ward. The potential for population growth or decline within each ward was also considered. In November 2006, a motion was passed by the Board of Trustees to amend the Trustee Electoral Ward Design Criteria to have a balance of ward population of +/- 15 per cent. A review of the ward boundaries was conducted prior to the election in 2013. The existing ward boundaries did not meet the criteria at the time, as Ward H had a resident population of public school supporters greater than the desired 15 per cent average for all wards. On January 22, 2013, a motion was passed to increase the population criteria from 15 per cent to 25 per cent. This amendment allowed the trustee electoral ward boundaries to remain unchanged. This guideline is consistent with the City of Edmonton's Design Policy Criteria for the City Council ward boundaries. Prior to the municipal election, the Trustee Ward boundaries were amended to adhere to the design criteria. At this time, the boundaries of all wards were amended.

The *Education Act* (as of January 1, 2020) specifies that school divisions must "confirm or amend the boundaries of its existing wards or electoral subdivisions by December 31, 2020" (Section 260 (5)).

Recommendation Report

The Act, under Section 76 Establishment of wards, also specifies that any bylaw passed to amend ward boundaries:

- "does not apply to the general election next following the passing of the bylaw unless it is passed before December 31 in the year prior to that general election being held", and
- "does not apply to or affect the composition of the board until the date of the next general election to which the bylaw applies."

Due to timelines regarding nomination day in the *Local Authorities Election Act*, the City of Edmonton Elections and Census office, who is responsible to the Minister of Municipal Affairs for election matters, has informed our Division's administration that September 2020 would be the ideal timeline to receive amended Trustee ward boundaries in order to prepare for all the processes that must occur prior to nomination day. The approval of ward boundary options at this time will meet the specified deadlines as set out in the *Education Act* and respects the requirements by which the City of Edmonton Elections and Census Office must abide.

During the March 10, 2020, Caucus meeting, the Board of Trustees were presented with four potential ward boundary realignment concepts to consider: Concept I (EPSB Ward based), Concept II (City of Edmonton Ward based), Concept III (City of Edmonton Planning Sectors based), and Concept IV (MLA Riding based). The Board gave feedback to administration to proceed with gathering stakeholder feedback on Concepts I and IV, which were renamed Concepts A and B to avoid confusion during public engagements.

Administration proceeded with stakeholder engagement between April 17 and May 1, 2020, which included a brief introduction, rationale, and background on why school Trustee Ward Boundaries are under review.

A complete summary of the feedback is provided in Attachment I. The engagement consisted of an online survey and was advertised and communicated through the following channels:

- a news story on epsb.ca and Connect News
- an email to Edmonton Federation of Community Leagues (EFCL) to distribute to community leagues
- information posted to SchoolZone
- news posted on Edmonton Public Schools' Facebook site
- information posted on Twitter
- letters to City of Edmonton Councilors and Members of the Legislative Assembly (MLA)

RELATED FACTS

- The *Education Act* requires the Board of Trustees to review and confirm/amend their ward boundaries prior to December 31, 2020.
- The Local Authorities Election Act has timelines for nomination day that require ward boundaries to be submitted to the City of Edmonton Elections and Census Office for September 2020, to ensure the boundaries are incorporated into the October 2021 municipal election.
- Administration completed public engagements through an online survey between April 17 and May 1, 2020.
- Once a concept is selected, a bylaw will need to pass the third reading for the new ward boundaries to be in effect for the 2021 Municipal Election.

RECOMMENDATION

That Concept A be approved as the recommended concept to inform bylaw amendment for the 2021 Municipal Election.

OPTIONS

Based on the information provided in this report, the following options are considered most appropriate:

- 1. Approve Concept A as the recommended concept to inform bylaw amendment for the 2021 Municipal Election.
- 2. Approve Concept B as the recommended concept to inform bylaw amendment for the 2021 Municipal Election.

CONSIDERATIONS and ANALYSIS

Concept A (Attachment III) is the concept that most closely resembles the existing Trustee ward boundaries. This concept makes as few changes as possible to the existing wards and still meets the criteria. The stakeholder feedback for this concept indicated that it had a higher level of comfort for the stakeholders. Stakeholders also appreciated fewer changes so that current relationships could be maintained. This concept has the largest distribution of projected population for three election periods. This indicates that this concept is the most likely to require a review in future election years.

Concept B (Attachment IV) is the concept that aligns with Member of Legislative Assembly (MLA) ward boundaries. Of the 20 MLA wards, only four wards were split between two Trustee wards. The stakeholder feedback for this concept indicated that there was a stronger ability to align government and educational needs as well as communicating with similar stakeholders. Stakeholders also said that they felt this was too big of a change and that made them less comfortable with this concept. This concept has the smallest distribution of projected population for three election periods. This indicates that this concept is the least likely to require a review in future election years. In addition, although not a formal criteria, administration looked at the distribution of students and this concept had the best distribution of total current students.

Both concepts meet the Trustee Electoral Ward Design Criteria and while Concept B may be stronger from an analytical point of view, the boundaries represent how Trustees work with stakeholders and stakeholder comfort was higher with Concept A. For this reason, administration is recommending Concept A be considered by the Board of Trustees for inclusion into the bylaw amendment for the 2021 Municipal Election.

NEXT STEPS

- A bylaw will be drafted on the recommended concept and will come to future Board meetings for first, second and third readings.
- 2. Once passed, the bylaw and the approved boundaries will be sent to the City of Edmonton Elections and Census Office for incorporation for the 2021 Municipal Election.
- 3. In accordance with Section 76(2.2) of the *Education Act*, administration will provide a copy of a bylaw passed under this section to the Minister as information before December 31, 2020. This will meet the deadlines specified in the *Education Act* and the *Local Authorities Election Act*.

What We Heard

April 17-May 1, 2020

BACKGROUND

Alberta school boards play an important role in shaping the direction and quality of education within their communities. Under the authority of the provincial government, each school board trustee is elected by, and accountable to, the people and families they serve. School board trustees are elected every four years and represent a ward in the city. A key responsibility for public school trustees is to stay in touch with community stakeholders so that they understand and make decisions based on what citizens value and want from their local public schools.

As the population of the City of Edmonton continues to grow, we need to review and adjust our existing trustee ward boundaries. This needs to be done because they do not currently meet the Trustee Ward Boundary Design Criteria. The criteria are as follows:

- 1. Each ward must have a population that is one-ninth of the total population of our city, plus or minus 25 per cent.
- 2. Future population growth or decline must be considered, keeping in mind the goal that each ward has a population of one-ninth of the total population of the city, plus or minus 25 per cent for the next 12 years.
- 3. Each ward should include entire school attendance areas where possible.
- 4. Each ward should be regular in shape and follow natural boundaries such as major roadways, railways, ravines, rivers, etc. when possible.
- 5. Try to keep communities and neighborhoods together in the same ward.

Changes to the ward boundaries must receive Ministerial approval by December 31, 2020, to be recognized for the 2021 municipal and school board elections. The Local Authorities Election Act has timelines for nominations that suggest ward boundaries be submitted to the Elections and Census Office in September 2020. The Board of Trustees is scheduled to vote on changes to the current ward boundaries at the public board meeting on June 23, 2020. The changes will come into effect for the municipal election in October 2021.

WHAT WAS DONE

An online survey was open to all stakeholders April 17, 2020, to May 1, 2020. <u>954</u> responses were received. The survey was advertised and communicated through the following channels:

- A news story on epsb.ca and Connect News (240 unique page views)
- An email to EFCL to distribute to community leagues
- Information posted to SchoolZone
- News posted on EPSB Facebook site (3 likes, 1 share, 1 comment, 2093 reach, 17 clicks)
- Information posted on Twitter (1066 impressions, 2 likes, 2 link clicks)
- A letter was sent to City of Edmonton Councilors and MLA's

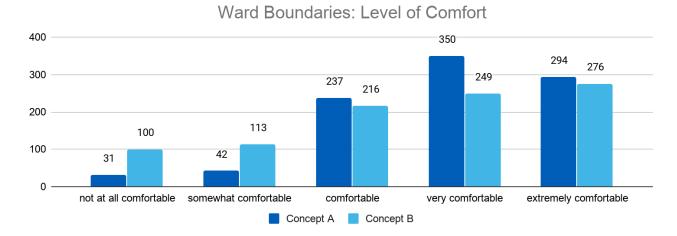

EXECUTIVE SUMMARY

Below are the results of the 2020 Ward Boundaries Survey. Respondents reported their "level of comfort" on each of the concepts and were able to provide additional comments for each.

RESULTS AND FINDINGS

Summary: Level of Comfort

The data from the survey indicated that respondents were more comfortable with Concept A and expressed higher levels of discomfort with Concept B.

Additional Comments:

The comments indicated that there was some confusion between trustee ward boundaries and attendance areas, transportation zones and program boundaries. This may have had an effect on the way some stakeholders responded.

Concept A

The following feedback themes emerged from Concept A:

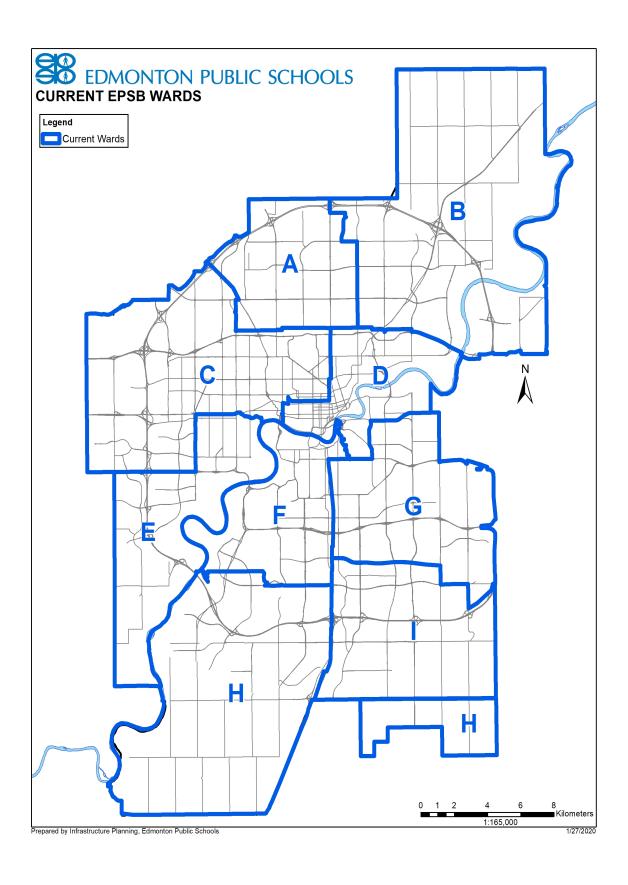

- Proposed boundaries are close to the current boundaries; less change/maintains previous relationships
- Comments regarding the large size and change in location of some boundaries
- Splitting of Ward H; why?
- Splitting communities

Concept B

The following feedback themes emerged from Concept B:

- Ability to align government and educational needs and communicate with stakeholders
- Splitting communities
- Too big of a change
- MLA's may control Trustee decisions and actions
- Offers balanced ward representation

Concept A:

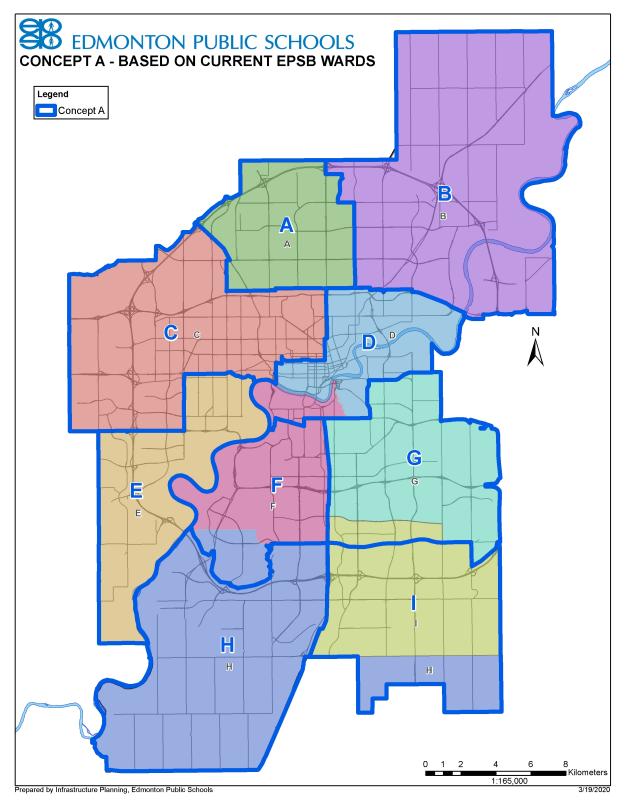

The Trustee electoral ward boundaries would be preserved as much as possible to minimize change. Since the boundary of the Division is expanded to include the annexation of lands south of 41 Avenue effective September 1, 2020, the existing wards will not meet the design criteria. The changes include shifting the boundaries between wards D, F, G, H, and I.

The strength of this concept is that it is the most familiar and incorporates as few changes as possible to meet the design criteria. This model is tied with Concept B for the most equity in terms of the number of schools per ward. The weakness of this concept is that it has a larger range for the 2031 projection; Ward H and Ward E have the largest difference of the wards in the concepts.

Concept B:

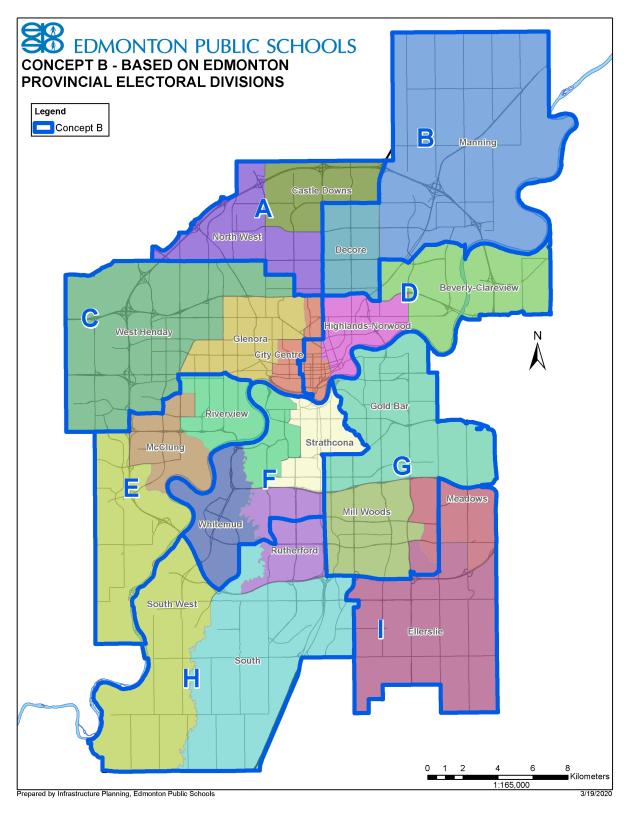

The design principle behind Concept B was to align Trustee ward boundaries as closely as possible to Member of Legislative Assembly (MLA) wards. This alignment could allow for greater communication, advocacy and coordination between MLAs and the Board on geographic issues as well as provide more opportunities for targeted advocacy through enhanced relationship building over shared constituencies. Since there are 19 MLA Wards and nine Trustee Wards total alignment was not possible; however, since the MLA wards are smaller and after balancing for the population only four MLA wards were split: City Centre, Rutherford, Southwest and Mill Woods. The South MLA ward is a minor split with only Magrath and MacTaggart neighbourhoods in a different ward.

The strengths of this concept are that it offers the best current distribution of students and it is tied with Concept A for the most equity in regards to the number of schools. This concept has the most equity in terms of the projected population in 2031. This shows that the model has the best longevity. This concept also shows the demographic difference in school planning.
