[HAH.AR Division Seclusion Rooms and Use of Physical Restraint](#)

ISSUE

On May 25, 2021, the Board passed the following motion:

That data on the use of seclusion and restraint are reported to the Board annually, along with work on systemic changes so that these practices are no longer needed or used.

BACKGROUND

The Standards for Seclusion and Physical Restraints in Alberta Schools are the basis for our Division's Administrative Regulation HAH.AR Seclusion Rooms and Use of Physical Restraint. The Division has established practices and standards that prioritize the safety and well-being of students and staff within a welcoming, inclusive, safe and healthy learning environment providing clear standards and expectations with respect to the use of seclusion rooms and physical restraint in the Division. Seclusion rooms and physical restraint are only to be used by staff who have met the training standards. Training provides staff with the skills to safely recognize and respond to crisis situations, focusing upon proactive approaches and de-escalation techniques.

CURRENT SITUATION

The Division continues to support systemic change through the development of staff capacity to ensure a positive proactive approach to supporting students with complex behavioral needs. This is approached through prevention with a focus on de-escalation, defusing challenging behaviours and building positive relationships. Despite a focus on prevention, a crisis or safety management plan may be necessary in exceptional situations where a student's behaviour has the potential to put their safety or the safety of others at serious and imminent risk of physical harm and when de-escalation, preventative strategies or alternative interventions are ineffective. The use of seclusion and/or physical restraint is a last resort as in a crisis or emergency situation.

Support for staff training is a shared responsibility between central administration and school principals. The Division provides professional learning to meet Division training standards through Nonviolent Crisis Intervention (NVC) and three complex behavior modules. The complex behaviour professional learning

modules A, B and C provide positive behaviour interventions and strategies through all tiers of the pyramid of intervention:

- Module A: provides a foundational look at positive behaviour supports and universal strategies that can support and promote mental health in the classroom.
- Module B: builds on the foundations of Module A and provides information about how complex behaviors develop, and some of the precipitating factors that can impact a student in the classroom such as executive functioning, regulation and trauma.
- Module C: provides in-depth instruction regarding Individual Behaviour Support Plan (IBSP) creation and building a supportive collaboration between family and school to support students with complex behavioural needs, including data tracking, and developing specific strategies for supporting students.

Historically, there has been strong participation in the Complex Behaviour Modules A, B and C as they are part of Division training standards for staff involved in the use of seclusion and/or physical restraint. When there is potential for the use of a seclusion room and/or physical restraint, schools are required to have a minimum of two staff who meet training standards. Modules B and C as well as Non Violent Crisis Intervention (NVCI) are required for staff in schools with operational seclusion rooms. Module A is strongly recommended. All modules are available to any Division staff member interested in taking them.

As most Division staff working in schools with operational seclusion rooms have completed this training, the current Module C participation numbers likely reflect either staff who are new to supporting students with complex behaviour learning needs or other interested staff.

Module	A: Universal	B: Targeted	C: Specialized
September 2022–March 2023 Number of Staff Participants	100	107	25

- Attendance in these modules is as follows:
 - As of March 31, 2023, 232 Division staff attended one or more of the complex behavior modules this school year.
 - Since 2019 up to and including March 2023, there have been a total of:
 - 1,481 staff who have attended Complex Behaviour Module A,
 - 1,499 Division staff who have attended Complex Behaviour Module B, and
 - 1,300 Division staff who have attended Complex Behaviour Module C.

Non Violent Crisis Intervention (NVCI) training includes conflict de-escalation training and techniques through online theory modules and virtual/in-person physical competency sessions.

Nonviolent Crisis Intervention (NVCI) September 2022–March 2023 Number of Staff Participants	
Online Theory Modules	588 complete (647 have registered to be completed in person)
Physical Competency Training	1,157

Nonviolent Crisis Intervention requires recertification every two years. The participation numbers above include staff seeking re-certification as well as staff taking the training for the first time. There are currently 2,497 Division staff who are certified in NVCI.

Alberta Education requires school Divisions to track and provide data each month on the use of operational seclusion rooms for each school with an operational seclusion room in their building. The following data is provided:

- For the 2021–2022 school year, there were 78 schools with one or more operational seclusion rooms, for a total of 151 operational seclusion rooms.
- For the 2022–2023 school year, there are 83 schools that have one or more operational seclusion rooms, for a total of 174 operational seclusion rooms.

With respect to the tables below, please note the following:

- The 2019–2020 data reflects September to mid-March due to the transition to emergent remote learning for all students on March 16, 2020.
- The 2020–2021 data reflects in-person learners with approximately 30 per cent of Division students learning online.
- The 2021–2022 data reflects in-person learners with approximately five per cent of Division students learning online.
- Unique Students refers to the number of different students using the seclusion room that month (the same student may have used a seclusion room more than once).

TOTAL	1711	284	706	334	1469	549	830	372

The seclusion room data from September 2022 to March 2023 data indicates that there were 2022 uses of these spaces across the Division:

- 1,192 (or 58.95 per cent) of uses were self-selected
- 830 (or 41.05 per cent) of uses were non-self-selected

In the table above, the data indicates an overall downward trend for non-self-selected seclusion room use from 2019–2020 to 2022–2023.

During the 2020–2021 school year, the Division created a process to collect physical restraint data and provided staff with training relative to the collection of this data. For that school year, some data was collected but it is not considered comprehensive and as a result, has not been included in this report. The 2022–2023 school year is the second year that the Division has collected comprehensive physical restraint data.

With respect to the Physical Restraint table below, the data is separate from the self-selected and non-self-selected seclusion room use data.

Month	Physical Restraint				Seclusion and Physical Restraint

TOTAL	612	343	418	258	392	279	287	194

KEY POINTS

- The Division continues to support systemic change through professional learning and building staff capacity relative to supporting students with complex behavioural needs.
- Positive and proactive strategies with a focus on de-escalation are always to be used first to prevent the use of seclusion and/or physical restraint.
- The use of seclusion and/or physical restraint is a last resort in a crisis or emergency situation when a student’s behaviour has the potential to put their safety or the safety of others at serious and imminent risk of physical harm and de-escalation, preventative strategies or alternative interventions are ineffective.
- Overall, the data indicates a downward trend for non-self-selected seclusion room use from 2019–2020 to 2022–2023.
- This is the second year for the collection of comprehensive physical restraint data across all schools.
